### Education

---

- MS Aeronautics, Educational Technology, Embry-Riddle Aeronautical University
- MA Psychology, Antioch University
- BA Law and Justice, Central Washington University

### Professional Experience

---

At CityU since 2005, Garrin teaches in the BA Applied Psychology and General Studies programs. He has also taught in the MA Counseling Psychology and BA Human Services programs. He is the designer-developer for a grant-funded Math Learning Center at City University of Seattle and continues those math tutoring services for CityU students. Garrin believes every student can succeed in learning mathematics and understanding its applications. He looks forward to sharing the joys of mathematics with adult learners.

Prior to CityU, Garrin worked in various fields of criminal justice and eventually found his way to the scientific fields of human performance psychology. He researches human factors and training designs that target optimal performance in complex operational environments, and he is currently investigating instructional paradigms for responsive web-/computer-based mathematics learning.
