## **Professional Experience**

---

Dr. Payam Saadat is the Director of the Bachelor of Science in Business Administration (BSBA) and Undergraduate Business programs. He has been designing, developing, and teaching undergraduate and graduate-level business administration and project management courses at City University of Seattle for several years. His recent project involves designing and developing our new BSBA program. Focusing on his academic work, Dr. Saadat has published articles in a number of peer-reviewed journals, managed/mentored international research teams for publishing projects, and represented CityU by presenting his research work at major conferences. As a developmental strategist, management consultant, and professional trainer, Dr. Saadat has successfully created high-performance teams and managed multiple large-scale projects and programs for international civil engineering companies for over a decade. His research interests and areas of expertise primarily include designing decentralized models of management and engineering self-organization in human social systems.
