

Course Home Navigation

Each Brightspace course has a consistent Course Home page that is widget-based. You can navigate to the Course Home from any location in your course by clicking on the link in the top navigation menu.

Widgets may be expanded or collapsed based on your preferences.

Course Home widgets include the following:

- Calendar for your course listing due dates events set by the instructor
- D2L Visual TOC with links to Content modules where the majority of course information, activities, and assignments are found
- Faculty Information with contact information for the instructor for the course
- Activity Feed where much of the communication between the instructor and students will take place such as posting announcements or asking questions about course content
