

## Your Course Homepage

Each Brightspace course has a consistent Course Homepage that is widget-based. You can navigate to the Course Home from any location in your course by clicking on the Course Home link in the top navigation menu.

Widgets may be expanded or collapsed based on your preferences.

Course Home widgets include the following:

- Calendar for your course listing due dates from your instructor
- D2L Visual TOC with links to Content modules where the majority of course information, activities, and assignments are found
- Faculty Information with a brief introduction to the instructor for your course
- Activity Feed where much of the communication between you and your instructor will take place such as posting announcements or asking questions about course content
